

controller LN-IR28B-12 (12V, 72W, 28 Button)

Summarize

28-key infrared controller adopts the advanced micro control unit, it is used for controlling a variety of lamp whose source of light is LED. For instance, point source of light, flexible light strip, wall washer lamp, glass curtain wall light and so on; it has many advantages such as low price, easy connection and simplicity to use. Meanwhile, you could adjust brightness, static color choices and various dynamic changes in lighting effects through infrared remote control. Besides, you also could adjust random color by yourself freely.

Technical parameters

- Working Temperature: -20~+60°C
- Supply Voltage: DC12V
- Output: 3 channels
- Connection Mode: common anode
- External Dimension: L63XW35XH22 mm
- Packing Size: L105XW65XH40 mm
- Net Weight: 50g
- Gross Weight: 70g
- Static Power: <1W
- Output Current: <2A (each channel)
- Output Power: 12V<72W

Interface Specification

Power input interface:

Adopt conventional power Transposon as a DC power input interface.

Infrared receiver interface:

Adopt oblate three-way wire, and connect an infrared receiver to receive an external infrared.

Load output interface:

Adopt oblate interface.

Direction for Use

1. Connect the load wire at first, following by the power wire. **Please ensure short circuit can not occur between connecting wire before you turn on the power.**
2. operation, you will receive infrared remote control in front of infrared receiver to ensure that there is no barrier between the remote control and receiving head.

The key-press functions are shown in the table below (in accordance with the key position order):

Brightness rise (a total of eight grading)	Brightness drop (a total of eight grading)	Pause/Run	On/Off
Static red	Static green	Static blue	Static white
Static orange	Static light green	Static deep blue	7-color jumpy changing
Static deep yellow	Static cyan	Static brown	the overall gradually changing (brightness)
Static yellow	Static light blue	Static purple	7-color gradually changing
Increase red	Increase green	Increase blue	Red, green, blue color jumpy changing
Decrease red	Decrease green	Decrease blue	DIY(adjust color by customer)

3. Complement explanation:

About DIY key, when it's pressed first time, will enter the DIY color mode, you can adjust the color per the 6 keys in the left to increase or decrease the R/G/B color by yourself freely (if other key is pressed this time, will jump out from DIY color mode). And you can save the color which you have adjusted by pressing the DIY key once again. When next time this key is pressed, it will show the color you saved last time.
